

ST-D307 Dental Treatment Centre

The ST-D307 is the all in one dental treatment centre. The chair has a built-in 24v noiseless DC self-regulation motor with 3 memory pre-set programmes with manual and automatic control buttons on the doctor's instrument bridge. Complete with full functional foot control, it also comes with a traditional "hanging hose" delivery system with a large instrument tray, 3 handpiece hoses, 3 way syringe and air brake arm. Assistant's bridge with automatic high and low volume suction hoses, 3 way syringe, automatic spittoon flush and cup filler control system and spittoon bowl can rotate in front of the patient without them having to move.
