

F1-A

The F1-A is the most advanced air controlled unit in the F1 Fimet product family. Fitted with fibre optic hoses, dual joystick chair foot control operation, synchronized backrest and legrest movement, Trendelenberg position, and a number of options to meet your demands. The unique F1 unit light weight “whip arm” system can be positioned so patients can't see it and the instruments selected from a convenient and ergonomic location to relieve some of the physical strains encountered while working.
