

F1-M

The F1-M dental system is the most economical air controlled dental unit in the Fimet product range. Designed with less complexity, the F1-M answers a need for lower cost and greater value. Features include a unique swivel cuspidor, multi-adjustable assistant stand, "hands free" on/off sensor operation light with 2 intensities and a selection of the most common optional accessories including medical water supply to instruments, scaler, micromotor, curing light, intraoral camera and multimedia. One of the most popular dental units in the Fimet family range, the F1-M unit has an exceptional Australian performance "track record" of high quality performance and longevity.
